

ABT ETHYLENE GLYCOL FREEZE with or without SUCROSE

ABT ETHYLENE GLYCOL FREEZE is formulated for the direct transfer of embryos after thawing. Rehydration is not required therefore embryos can be kept in the same straw for transfer as they were frozen. ABT offers multiple size packaging with or without sucrose.

ABT's Ethylene Glycol Freeze starts with ultra-purified Type 1 water. All ABT products are manufactured in a cleanroom environment and go thru strict quality control practices, ensuring consistency and quality from lot to lot.

- 1.5M Ethylene Glycol Freeze is available with or without 0.1M Sucrose
- Includes Gentamycin as an antibiotic
- 100% traceable components including certified New Zealand sourced BSA
- Tight quality control standards equal consistent results
- Durable EVA packaging with a non-latex needle septum port and removable cap
- Made in the USA with two decades of experience

ABOUT ABT 360

Located in Pullman, Washington, USA, ABT 360 is owned and operated by Kathy Shearer who has 25 years of experience manufacturing embryo transfer media and Alyssa Hood who has assisted in and managed that same manufacturing facility since 1995. Formed with integrity and experience, ABT 360 has what it takes to support all of your embryo transfer media needs. We look forward to continuing our relationships with the veterinary reproduction community and we will strive to provide quality and consistency in our products, supported by exceptional customer service.
